

New Indexing System

- Combine pre- and post-conversion orders
- Index OrderRequest JSON
- Very fast (target: < 1sec response time)
- Elasticsearch or Postgres FTS

Faceted Search

- Provide rapid access
- Identify trends
- Demonstrate Counsyl's value

Full Text Search

- Enable direct patient lookup
- Accommodate misspellings
- Search by clinic's identifier
- Possibly: completion/autosuggest
- Possibly: search by gene/disease

Filtering/Sorting

- Modern backend
- Reduce technical debt from previous Django admin implementation
